**THEMES AND TOPICS**

The advent of Dr Sankaran's work on understanding the sensations in plant kingdoms proved to be a pathbreaking development in homeopathic case-taking and analysis. These ideas proved to be very useful in clinical practice.

From this idea of understanding the sensations of the families, Dr Sankaran further researched the plant classes, namely the dicotyledons, monocotyledons, gymnosperms, mosses and ferns. This understanding served to be a very important missing link and also brought to awareness the concept of superclasses which brings together groups of remedies from all the kingdoms. The evolution of a more clearer understanding of the superclass paved the way to a new way of looking at our patients and remedies.

In this seminar Dr Sankaran would be sharing these latest ideas and understanding about plant classes, with new homeopathic insights into botanical subclasses, which will help strengthen the understanding of the Sensation Method and in its practical application with better results.

**ABOUT DR. RAJAN SANKARAN**

**Rajan Sankaran**, MD (Hom), is an internationally renowned thinker, teacher and writer of the homeopathic system of medicine. He is reputed to be a clear and original thinker and is best known for his path breaking concepts in Homeopathy. His understanding of disease as a delusion followed by his discovery of newer miasms, classification of diseased states into kingdoms (viz. plant, mineral and animal) and the seven levels of experience, brought in much more clarity into understanding diseased states. This paved way to one of the most path-breaking concept of eliciting the vital sensation in the patient, the common thread of experience which runs through the patient at all levels. This method, popular as 'Sensation method', was yet not the end of the untiring efforts to simplify the system of homeopathic practice. The Sensation method has now evolved into a more comprehensive and synergistic approach, which strongly advocates to encompass and integrate the old, classical and traditional approaches with the latest advances. This approach - 'The Synergy of Homeopathy', has resulted in a far greater predictability of results than ever before. Dr Sankaran heads 'the other song-International Academy of Advanced Homeopathy', in Mumbai. This academy primarily focuses on imparting advanced clinical training to students and practitioners, integrated with a homeopathic healing centre.

Dr. Sankaran's lucid style and simplicity also makes him very popular as a teacher amongst homeopaths worldwide. His seminars and teaching courses have been widely attended in India and abroad. He has lectured in Australia, Austria, Belgium, Canada, England, France, Germany, Holland, Israel, Italy, New Zealand, Norway, Russia, Slovakia, Spain, South Africa, Switzerland and U.S.A. Along with his colleagues he founded The Homeopathic Research and Charities, which is an Institution involved in various teaching courses.

He is the author of several books including: The Spirit of Homeopathy - The Substance of Homeopathy - The Soul of Remedies -The System of Homeopathy - The Sensation in Homeopathy.
